

Dubai e-Learning Declaration

1. Having passionate leadership for the development and adoption of e-learning in all aspects of a K-based modern society
2. Creating learning opportunities for all, through availability, accessibility, affordability and flexibility in line with MDGs (Millennium Development Goals).
3. Developing excellent learning environments through the provision of open systems, stakeholder involvement and e-based infrastructure.
4. Managing K-based assets and focusing on the growth in value of intellectual, structural and informational capital.
5. Exploiting technological innovations for driving and nurturing the growth, development and adoption of e-learning in all walks of life.
6. Promoting through continuous awareness acceptance of e-learning as an option for encouraging and enhancing education at various levels.
7. Stimulating debates, information exchange and the development of useful theories and application solutions, through scientific research, symposium and conferences.
8. Emphasizing the importance of quality in e-learning through the development and adoption of standards and benchmarks at internationally known and respected levels.

9. Supporting the creation of a regional hub that can enrich the debate on e-learning and its usefulness and appropriateness to the Middle East Region.
10. Investing in the development of k-creation processes through the adaptation of a Total Transformation of Thinking approach to e-learning and ensuring its positive impact on k-based society.
11. Supporting the global growth and development of k-transfer and exchanges in e-learning and the sharing of best practices experiences through active participation, membership of worthy and credible societies, associations...
12. Playing an active role through widening involvement at all levels for supporting the effective development of K-options as solutions for the individual citizen, the corporation, the economy and the society at large.
